

YOU CAN IMPROVE PATIENT CARE.

(Yes, even if your treatment times are already great).

WHY PULSARA?

We believe that ALL patients deserve safe, efficient, well-coordinated care. To achieve that, all members of a care team must be able to communicate clearly with each other, regardless of where they're located or the patient condition.

HOW DOES IT WORK?

Pulsara replaces phone calls, radios, faxes, and other outdated communication tools and instead connects all members of the care team in real time on a united communication channel.

Pulsara's mobile platform simplifies communication among the ENTIRE care team, reducing treatment times by an average of 30%.

YOUR NEXT STEPS

1. START HERE: Decide which package is right for you and fill out the corresponding form.
2. Complete remote implementation in **as little as 6 hours**.
3. Communicate effortlessly with any other care team member.
