

LEARN ⁱHOW

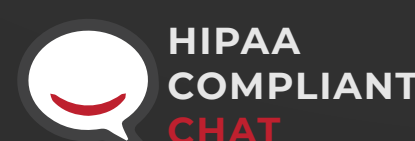

PULSARA SAVES TIME

The HIPAA-compliant Pulsara platform saves you time and headache when coordinating with your teams - with just a tap, EMS and hospitals are on the same page!

When EMS teams are truly integrated with hospital teams forming one continuous care team around the patient, miscommunication is a thing of the past. That means faster treatment times for your patients, and more efficient workflows for clinicians.

Care Teams UNITE! APP FEATURE HIGHLIGHTS

> Regional Systems of Care UNITE!

Know who's on your care team, when they've gotten your alerts, and what to do next — all without making a single radio call.

> Save Time!

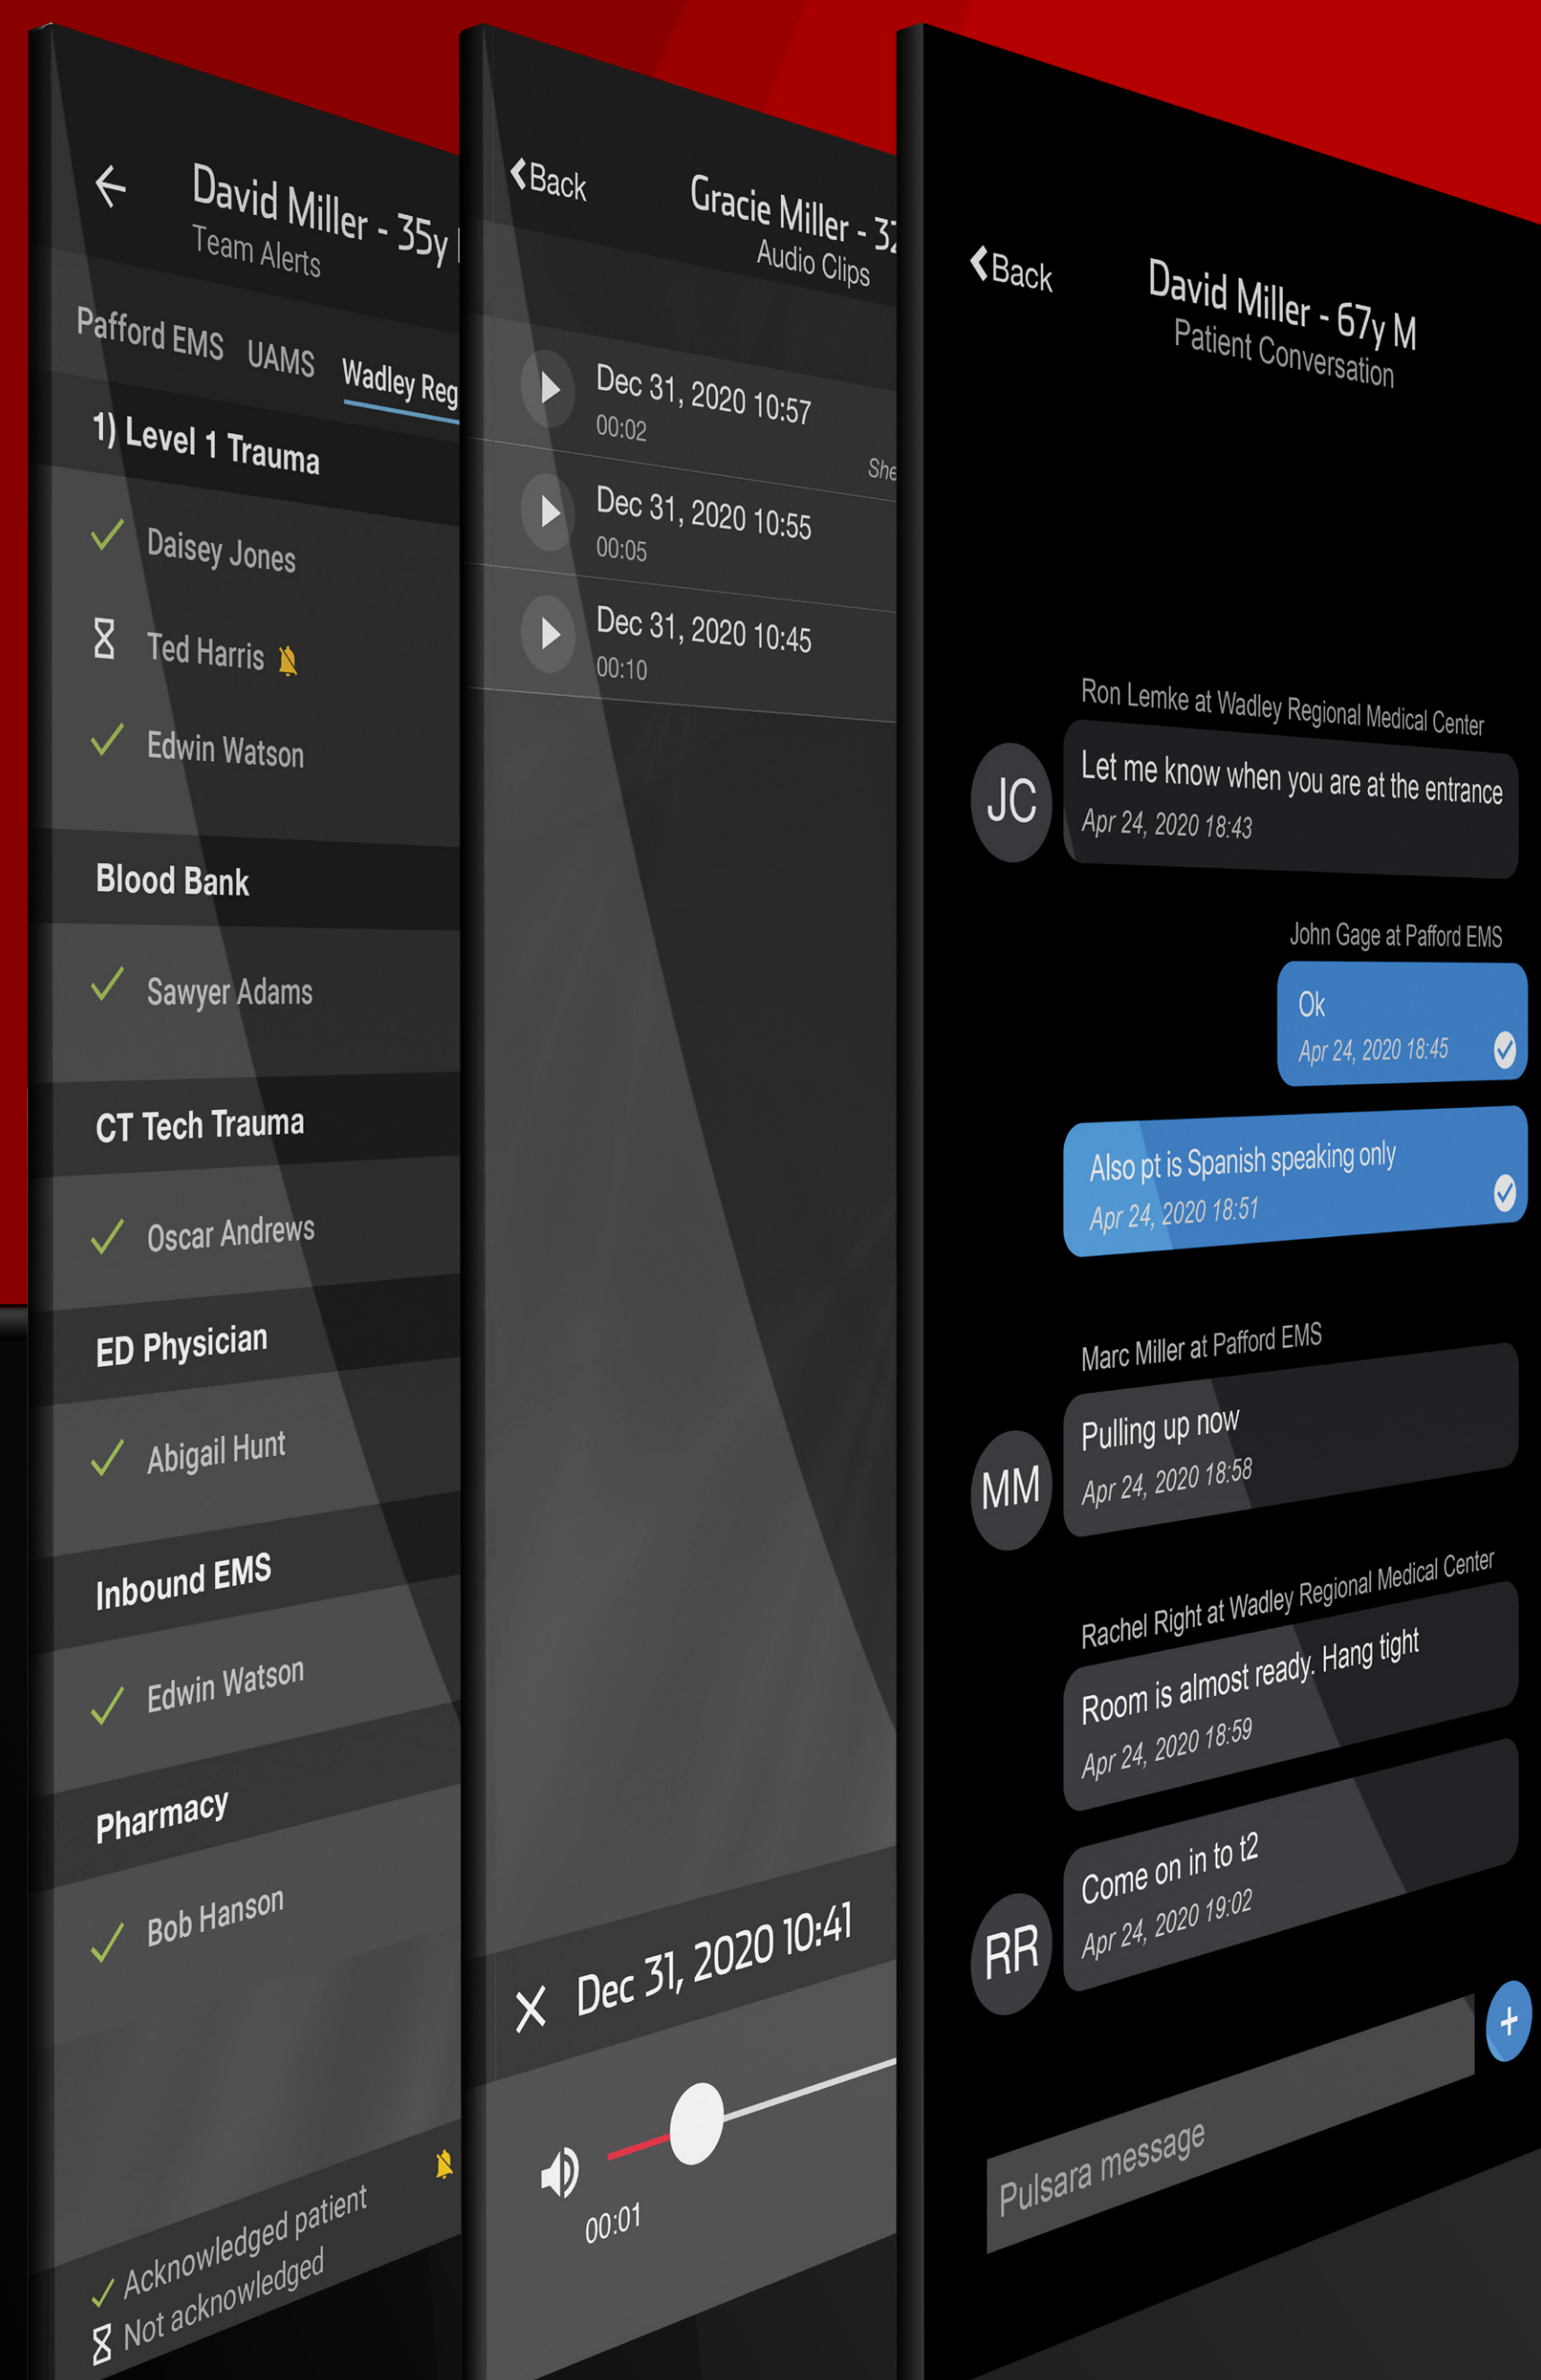

Our data shows that EMS users spend only seconds using the Pulsara platform yet can transmit more information than with radios. No more outdated technology that wastes time and leads to miscommunication.

> Live Video Consults

Get a consult in real time from ANYWHERE for any patient, avoiding unnecessary transports and speeding treatment times.

> Team Feedback Includes EMS

Send and receive patient updates. Easily scan who has viewed and acknowledged communications, including on-call physicians, EMS medics and any other care team member.
