

IT'S ABOUT **PEOPLE**

# Want to Reduce Treatment Times? Enable Networked Communication!

With Pulsara, EMS and hospital teams can instantly and securely communicate event-based patient information. With just a tap, everyone on the care team is notified using live audio and video, image sharing, instant messaging, and more.

www.pulsara.com

## Simplify Workflows

Consult from anywhere, scale for any condition or event, and improve quality of care.

## One Dedicated Patient Channel

Unlike other platforms, Pulsara uses one patient channel for all the team members so everyone who is associated with the patient, regardless of location or role, is on the same page at the same time. No more miscommunication or repeating the radio report.

## Synchronized Teams

Pulsara connects organizations with ONE source of truth. With miscommunication accounting for 80% of fatal medical errors, inter-organization communication has never been more important.

## Streamlined Patient Care

Pulsara simplifies workflows, replaces the radio report, and enables EMS to be a connected part of every patient case.
