 pulsara®

Provide Faster Care Through Simplified Communication.

Pulsara is a HIPAA-compliant, secure, easy-to-use app that unites the entire care team — even if they are in different departments or organizations. By replacing multiple phone calls, radio reports, faxes, and pagers with one unified patient channel, care providers see reduced treatment times and happier patients and caregivers.
With Pulsara, it's simple:

1
CREATE your dedicated patient channel.

2
BUILD your configurable team with just a tap.

3
And COMMUNICATE.

Why Pulsara?

Pulsara is the only solution that helps facilitate and streamline care coordination across inter-organizational care teams for any patient event from stroke to STEMI to a pandemic to mass casualty incidents.

We're all about creating systems of care that scale. The platform enables geographically dispersed care teams to assemble and interact in real time across the care continuum using live audio, video, instant messaging, photo sharing and more.

Who Uses Pulsara?

Everyone — from Ambulance Services to urgent care to nursing homes, testing clinics, stroke teams, imaging, registration, standalone emergency facilities, Public Health, and even emergency management teams.

Pulsara is built for any interaction a patient's care team may need along the care journey.

Our solution is flexible to connect ANY and all members of the care team (rural and urban) — regardless of location or organization.

Pulsara is The Communication Platform that Connects Teams Across Organizations

pulsara®

Dynamically Build Your Team

ADD ANY MEMBER OF THE TEAM WITH A TAP

With Pulsara, Emergency Services can clearly communicate case details, allowing the hospital to activate the proper teams. And then, easily add additional team members as your patient's case evolves. Everybody is on the same page just like that.

Live Video Calling

**THE POSSIBILITIES ARE ENDLESS**

With Pulsara's live video calling capabilities medics can show the hospital team members the patient or scene or the emergency physician can consult her orthopedic surgeon about a complex hand laceration whether the orthopedic surgeon is at her hospital or a consultant miles away.

Key Time Stamps for Reporting

GLOBAL TIME STAMPS CAPTURED AUTOMATICALLY

Tired of spending hours trying to identify key timestamps and other data for compliance reporting? We can help! Pusara gives you the ability to dynamically build teams across healthcare entities and capture timestamps based on a universal clock. Save time and reduce frustration.

Audio Clips

SAVE TIME & REDUCE MISCOMMUNICATION

Allowing clinicians to record, save, and share audio clips empowers them to:

- Cut down on the amount of typing, filling out forms, and data entry.

- Minimize the reliance on outdated radio reports which only deliver information to individuals who will never take care of the patient.

- Share the RIGHT information with the ENTIRE TEAM instantaneously. No more errors from playing the telephone game.

Consult/Transfer

REAL-TIME CONSULTATIONS WITH A TAP

With Pulsara, you can get real-time consult from any other clinician, and transfer your patient with just a few taps. If something changes along the way, the whole team knows about it — instantly. PLUS, our Consult/Transfer feature unifies data and time stamps across organizations. Life at the transfer center just got a whole lot simpler.

Image Capture

SECURELY SHARE IMAGES

Send an image of the injury, scene, driver's license, documentation, or medication list directly from the bedside — to anyone on your care team — instantly and securely.

"
"Pulsara allows our team to receive information directly from the EMS provider or emergency department staff who treated the patient first — meaning there is less likelihood of communications errors that can be very detrimental to patient care."
