# IMPROVE SURGE RESPONSE

## COVID-19 SURGES

In previous COVID-19 surges, did you try to load-balance using **supply side data** like bed and resource availability?

If so, did you:

✔ Find the system frustrating to use?

✔ Still end up making hundreds of phone calls trying to find bed placement?

✔ Find that the more urgently you needed reliable supply data, the harder it was to get?

**Data alone will not solve the problem.**

## The Solution = Data + Logistics + Communication

**LEARN MORE**

## COMPLEX PROBLEMS NEED SIMPLE SOLUTIONS

Before the next stress event hits, consider overlaying your system with a **demand-driven system** built atop a robust communication and logistics platform.

⚙ Gain full regional visibility into which and how many patients need placement

⚙ Display to EMS whether your facility has availability

⚙ Match patient demand with hospital supply without a single phone call

## STOP THE CALL

Mitigate patient surge, eliminate unnecessary patient transfers, and save time and resources with Pulsara.
