

# HOSPITAL OR HEALTHCARE FACILITY

## Which Package is Right for You?

The Pulsara **ONE** package allows your facility to receive patients from inbound EMS, consult with providers from other organizations, and transfer the patient to Pulsara **UNITED** customers. Studies show that patient transfer times are reduced up to an hour when everyone is on the Pulsara network.

The Pulsara **UNITED** package for hospitals and healthcare facilities allows your facility to fully manage your critical care teams. In addition, you can receive patients from EMS and referral facilities, dynamically build internal teams, share instant feedback to everyone involved in the case, and easily gather reporting data for internal QA/CQI, accreditation, and national registries.
