Templates for Messaging - New Message

EMS Dashboard

EMS > Templates for Messaging

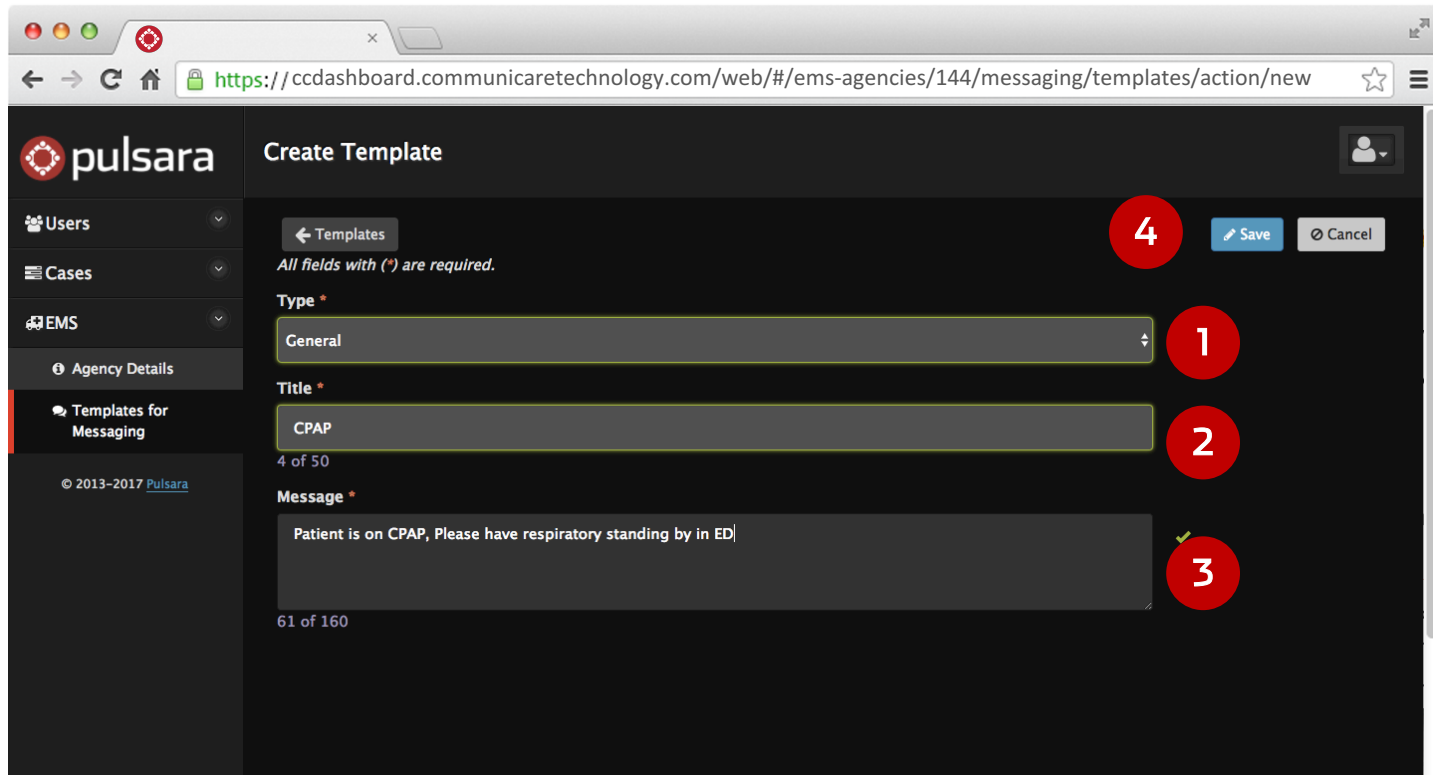

Create and edit templates so the care team can send quick messages about a patient to each other. You can add, remove, and edit message templates. Past versions of templates will still show up in your message logs.

Message Templates [+ Template](#)

STEMI	Stroke	General
Title	Message	Details
Cardiac Arrest	Patient has gone into cardiac arrest. Please b...	 
CP Protocol	IV, O2, ASA, ECG, Morphine	 
Date of Birth	Date of Birth	 

1. Under EMS select Templates for Messaging
2. Click the blue + Template button

Templates for Messaging - New Message

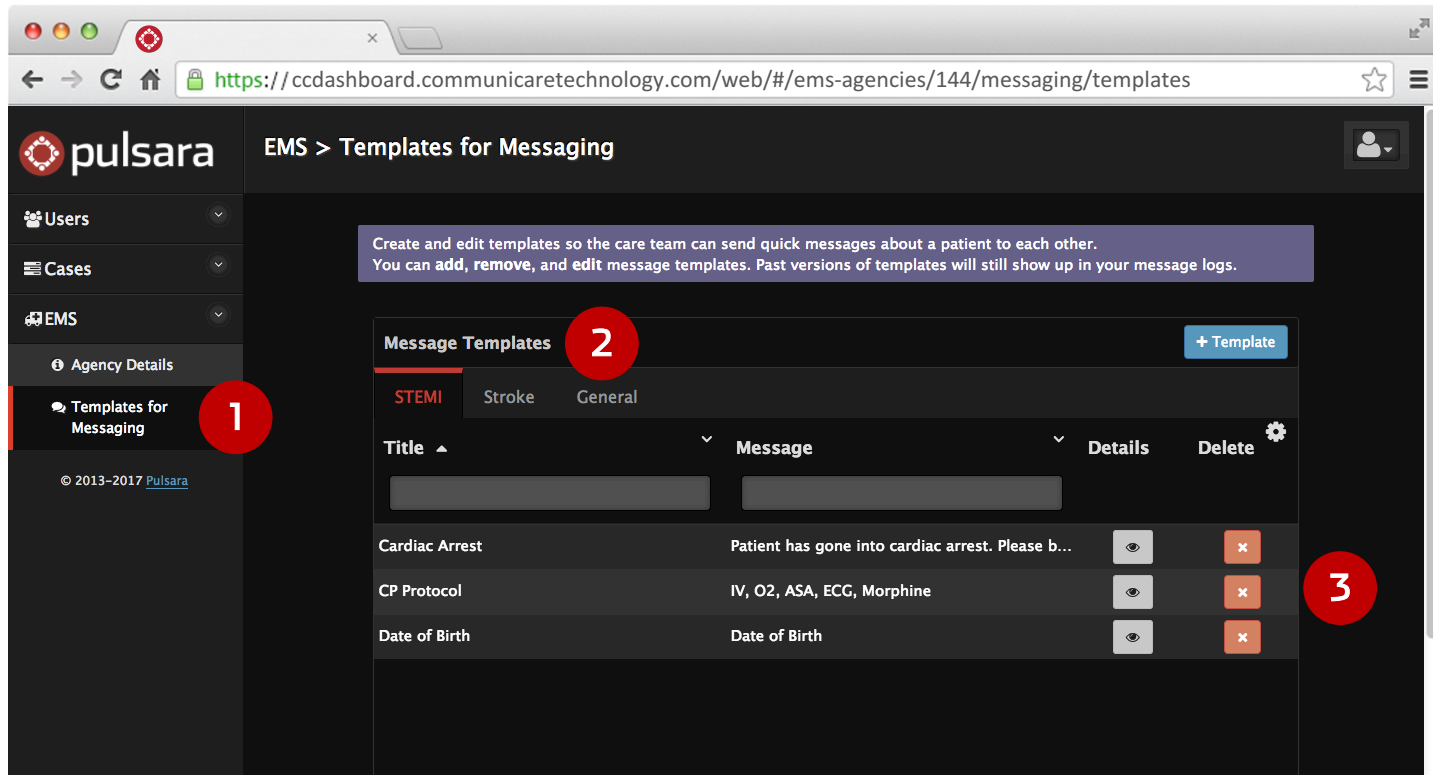

The screenshot shows a web browser window with the URL <https://ccdashboard.communicaretechnology.com/web/#/ems-agencies/144/messaging/templates/action/new>. The page title is "Create Template". On the left is a sidebar with the Pulsara logo and navigation links: Users, Cases, EMS, Agency Details, Templates for Messaging, and a footer with "© 2013-2017 Pulsara". The main form area has a "← Templates" button and "Save" and "Cancel" buttons. It contains three required fields: "Type" (a dropdown menu with "General" selected), "Title" (a text input with "CPAP"), and "Message" (a text area with "Patient is on CPAP, Please have respiratory standing by in ED"). Red circles with numbers 1, 2, 3, and 4 are overlaid on the form to indicate the steps: 1 points to the Type dropdown, 2 points to the Title input, 3 points to the Message text area, and 4 points to the Save button. A note states "All fields with (*) are required." and character counts are shown below the Title and Message fields.

1. Select the type of case where the template will appear (STEMI, Stroke, or General)
2. Create a title for the message (this is what the user will select from the drop down box)
3. Enter the message that will be displayed to the team
4. Click the blue Save button to save the message

Templates for Messaging – Editing Messages

EMS Dashboard

EMS > Templates for Messaging

Create and edit templates so the care team can send quick messages about a patient to each other. You can add, remove, and edit message templates. Past versions of templates will still show up in your message logs.

Message Templates + Template

STEMI Stroke General

Title	Message	Details	Delete
Cardiac Arrest	Patient has gone into cardiac arrest. Please b...		
CP Protocol	IV, O2, ASA, ECG, Morphine		
Date of Birth	Date of Birth		

1. Under EMS, select Templates for Messaging
